MOTOTRBO TWO-WAY RADIO SOLUTIONS AT A GLANCE
DISCOVER THE ULTIMATE IN SEAMLESS OPERATIONS WITH A TOTAL MOTOTRBO SOLUTION

INSTANTANEOUS PTT COMMUNICATION
Nothing is faster than push-to-talk (PTT) when you need a quick answer or immediate emergency response. It provides real-time communication for individuals or groups across your entire team from the control room to the front-line, resulting in loyal customers, satisfied employees, and increased business.

HEAR AND BE HEARD CLEARLY IN NOISY ENVIRONMENTS
Superb audio quality means MOTOTRBO delivers crystal-clear communications. The Intelligent Audio feature automatically adjusts radio volume up and down in response to the level of noise in the workplace. And with MOTOTRBO’s background noise suppression, you can be confident communication is loud and clear.

REACH YOUR WORKFORCE WHEREVER THEY GO
Hear calls clearly over a greater range. MOTOTRBO features advanced digital signal processing to deliver voice integrity and clarity to the limits of coverage. And thanks to MOTOTRBO’s TDMA technology, MOTOTRBO delivers twice the call capacity of analog radios so more workers can use voice and data, without worrying about privacy or interference.

KEEP COMMUNICATING FOR LONGER
Because MOTOTRBO radios use much less power in digital mode than analog, batteries last significantly longer on a single charge.

MOVE FROM ANALOG TO DIGITAL WITH EASE
Migrate at your own pace, one talk group or department at a time. MOTOTRBO radios operate in both analog and digital mode, so you can use them on your existing analog system and move to digital when you’re ready – all while running operations smoothly.

GET ADVANCED CAPABILITIES AND BUSINESS-CRITICAL FEATURES
MOTOTRBO has innovative features such as Transmit Interrupt, which lets you prioritize communication the moment it’s needed. Man Down and Lone Worker applications call for help when personnel can’t. GPS location tracking monitors vehicles, assets, and the user in real time.

LEVERAGE EXPERT APPLICATIONS THAT GET THE JOB DONE EFFICIENTLY
MOTOTRBO fits the way businesses run today, with an expert Application Developer Program that helps you customize your communication solution to your environment and workforce. Solutions range from text messaging, centralized dispatch and GPS tracking to personnel monitoring and work-order ticket management. Applications like these make it easier to accomplish multiple tasks on a single purpose-built device.

KEEP CONNECTED WHEN CONDITIONS ARE TOUGHEST
MOTOTRBO is made to last. Our rugged, waterproof and intrinsically safe radios endure a rigorous Accelerated Life Testing (ALT) purpose-built device which simulates up to 5 years of field use. We design and engineer MOTOTRBO products to survive the harsh conditions of everyday business.

REACH EVERYONE, ANYWHERE
When you’re running a professional operation, you need more than just radio-to-radio communications. MOTOTRBO has coverage options to suit your needs – whether you’re operating in a single building, a large campus, or even multiple locations around the world. Connecting thousands of radio and smartphone users in a single location, your capacity options are virtually unlimited.

Having MOTOTRBO at the heart of your organization will help you achieve new levels of productivity, safety and efficiency. The extensive portfolio means you can custom-build your complete solution including radios, infrastructure, systems, accessories, applications, and services designed around what you need today and in the future.
PORTABLE AND MOBILE RADIOS

The MOTOTRBO two-way radio portfolio offers you a wide choice of devices, from simple voice-only models to feature-rich voice and data radios. All devices work together seamlessly to deliver advanced features to enhance your safety, productivity and efficiency. With exceptional voice quality and outstanding usability, MOTOTRBO keeps your workforce connected.

CP200d
SIMPLE VOICE COMMUNICATIONS FOR THE EVERYDAY USER WHO WANTS TO STAY CONNECTED
Communicate simply and clearly. The CP200d gives you affordable analog voice communications, with the option to upgrade to MOTOTRBO digital when you’re ready. With great performance and rugged durability, the CP200d simply keeps your workforce connected.

COMPATIBLE WITH:
- IP Site Connect
- Capacity Plus
- Capacity Max
- Connect Plus

SL300
SLIM AND STYLISH, FOR THE CUSTOMER SERVICE USER WHO NEEDS INTUITIVE TECHNOLOGY
Connect to intuitive technology with this slim, lightweight radio. An eye-catching Active View display combines ruggedness with simplicity, and patented Range Max technology delivers great coverage with long battery life in a small, convenient outline. The radio supports analog and digital modes, and is complemented by a range of innovative accessories.

COMPATIBLE WITH:
- IP Site Connect
- Capacity Plus
- Capacity Max
- Connect Plus

CM SERIES
SIMPLE VOICE COMMUNICATIONS FOR THE EVERYDAY USER WHO WANTS TO STAY CONNECTED
Communicate simply and safely. CM200d and CM300d radios give you affordable analog voice communications, with the option to upgrade to MOTOTRBO digital when you’re ready. With great performance and a straightforward user interface, the CM200d and CM300d simply keep your workforce connected.

COMPATIBLE WITH:
- IP Site Connect
- Capacity Plus
- Capacity Max
- Connect Plus
**ENTRY PROFESSIONAL TIER**

**SL 3500e**
INSTANT COMMUNICATION, PROFESSIONAL STYLE

Slim, lightweight, and discreet, the MOTOTRBO SL3500e portable two-way radio gives you the power of instant two-way communication without compromising your style. Get quick access to key radio functions along with information at a glance. Connect discreetly to Bluetooth® earpieces and sensors. And access Wi-Fi networks for over-the-air software updates.

**COMPATIBLE WITH:**
- IP Site Connect
- Capacity Plus
- Capacity Max
- Connect Plus

**XPR 3000e**
COMPACT AND CAPABLE, FOR THE BUSY WORKER WHO NEEDS TO COMMUNICATE EFFICIENTLY

Connect with efficiency. The XPR 3000e Series delivers analog and digital voice capabilities, with support for basic systems and a feature-set geared to maximum workplace efficiency—including Wi-Fi for remote radio management and Bluetooth 4.0 (please check for availability). With excellent range and impressive battery life, these radios deliver cost-effective connectivity.

**COMPATIBLE WITH:**
- IP Site Connect
- Capacity Plus
- Capacity Max
- Connect Plus

**XPR 2500**
AFFORDABLE VOICE COMMUNICATIONS FOR THE BUSY PROFESSIONAL

The power of digital is within reach. The XPR 2500 features voice systems capability, twice the calling capacity and clearer voice communications. With Intelligent Audio, drivers don’t need to adjust radio volume to avoid missing a call: the XPR 2500 monitors background noise and automatically adjusts itself.

**COMPATIBLE WITH:**
- IP Site Connect
- Capacity Plus
- Capacity Max
- Connect Plus

**XPR 7000e**
STAY IN CONTROL WITH THE ULTIMATE IN PROFESSIONAL DIGITAL COMMUNICATIONS

SL 7000e SLEEK AND SMART, FOR THE MANAGER WHO NEEDS COMPLETE CONTROL

Stay in control with the ultimate in professional digital communications. This slim and light portable radio is packed with features to help you direct operations. From integrated Wi-Fi and Bluetooth 4.0, to a user interface designed for the latest workforce management applications, the SL 7000e Series has everything you need to boost safety and productivity.

**COMPATIBLE WITH:**
- IP Site Connect
- Capacity Plus
- Capacity Max
- Connect Plus

**XPR 7000e**
POWERFUL AND SOPHISTICATED, FOR THE PROFESSIONAL WHO REFUSES TO COMPROMISE

When you need complete connectivity, the XPR 7000e Series delivers. These portable radios have excellent range, battery life and audio quality in all digital and analog systems, and a full suite of features to enhance safety and productivity. And with integrated Wi-Fi, GPS and Bluetooth 4.0, you can be confident that your radio integrates the latest technology.

**COMPATIBLE WITH:**
- IP Site Connect
- Capacity Plus
- Capacity Max
- Connect Plus

**XPR 5000e**
POWERFUL AND SOPHISTICATED, FOR THE PROFESSIONAL WHO REFUSES TO COMPROMISE

When you need complete connectivity, the XPR 5000e Series delivers. These mobile radios have excellent range and audio quality in all digital and analog systems, and a full suite of features to enhance safety and productivity. And with integrated Wi-Fi, GPS and Bluetooth 4.0, you can be confident that your radio integrates the latest technology.

**COMPATIBLE WITH:**
- IP Site Connect
- Capacity Plus
- Capacity Max
- Connect Plus

**CSA PORTABLE RADIOS (CANADA ONLY)**

Certified by CSA Group as intrinsically safe for use in Division 1, Class I, Groups A, B, C, D; Class II, Groups E, F, G, and Class III, when properly equipped with a Motorola CSA approved battery.

**COMPATIBLE WITH:**
- IP Site Connect
- Capacity Plus
- Capacity Max
- Connect Plus
BATTERIES AND CHARGERS
MOTOTRBO batteries are developed, tested and certified for optimal performance with your MOTOTRBO radios and they outperform other brands of batteries. IMPRES batteries can be charged 150 additional times versus a standard battery – a 43% increase in charge cycles. IMPRES Over the Air Battery Management automatically collects battery information over the air while radios are in use, making battery management easier than ever.

REMOTE SPEAKER MICROPHONES (RSM)
Communicate clearly in loud workplaces. MOTOTRBO RSMs have exclusive audio features like windporting for windy outdoor environments and noise-canceling to reduce background noise. Exclusive IMPRES technology ensures your voice is heard clearer and more loudly over a wide range of conditions and the INC RSM suppresses extreme noise from high decibel equipment and heavy machinery so you can be heard above all.

MOBILE RADIO MICROPHONES
Choose microphones designed to keep workers safely connected on the move. Keypad microphones let you easily navigate menus on your radios, dial phone numbers and send text messages. The Long Range Wireless Remote Speaker Microphone (RSM) allows you to stay in touch even on remote job sites when you depend on your mobile radio but have to work outside your vehicle. It pairs instantly to the mobile microphone with Bluetooth gateway.

CARRY SOLUTIONS
Carrying cases are available in sizes designed to fit your radio and battery and permit audio to be heard clearly. Our carry accessories keep your hands free, so you can concentrate on the task at hand. Choose from a wide range of nylon cases, leather cases, straps, holsters and clips, all designed to keep your radio protected, yet still easy to access.

INSTALLATION AND MOUNTING KITS
Mounting kits give you the flexibility to mount the radio under or in your dashboard, between seats or on the floor. Remote mount kits allow you to mount the radio in the truck when dash space is limited.

RADIO ACCESSORIES
From discreet Bluetooth earpieces to efficient battery solutions, our complete portfolio of accessories optimizes the performance of your MOTOTRBO radio. They are designed to help you perform your best, wherever you work, and unleash the power of the industry’s most advanced digital radio platform.

**BLUETOOTH® WIRELESS FOR PORTABLE AND MOBILE RADIOS**
Unleash the power of your MOTOTRBO radio without wires getting in the way. Our extensive suite of Bluetooth accessories free you to take the radio off your belt, leave your truck or step away from your desk (up to 30 feet away) and stay connected. Choose from a variety of earpieces, heavy duty wireless headsets and push-to-talk solutions that let you move without constraints around the workplace.

**EARPIECES**
Transmit and receive discreetly with a variety of earpieces that feature a streamlined design and rugged cables that withstand tough conditions. With in-line push-to-talk and microphones, they’re easy to use on the go. Our flexible array of surveillance kits includes two-wire kits (one wire for receiving, one wire for transmitting) and more discreet three-wire kits (separate wires for transmitting, receiving and push-to-talk).

**HEADSETS**
Protect hearing and facilitate communications in noisy environments. Select from a wide range of comfortable, durable, lightweight to heavy duty headsets with noise-canceling boom microphones and in-line push-to-talk.

SYSTEMS

No matter how large or small your enterprise, MOTOTRBO offers a wide range of systems specifically designed for your business — for the days ahead and the years beyond. You get the best of two-way radio with digital technology and enjoy integrated voice and data communication, increased capacity, enhanced features and exceptional voice quality, across the city and around the globe.

PORTABLE AND MOBILE RADIOS

CONVENTIONAL
BASELINE SINGLE SITE COVERAGE AND CAPACITY
A conventional system is a step up from basic radio-to-radio communications. Radios communicate via a high-power repeater, giving better coverage and more centralized control.

IP SITE CONNECT
COST-EFFECTIVE COVERAGE FOR MULTIPLE SITES
Use your IP network to extend the voice and data capabilities of MOTOTRBO by linking repeaters together. You can create a continuous network that covers employees at 15 geographically-dispersed locations. You can also link up to 15 repeaters to create wide area coverage or enhance coverage quality at a single site.

CAPACITY PLUS
COST-EFFECTIVE COVERAGE AND CAPACITY FOR SINGLE AND MULTIPLE SITES
Expand the capacity and extend the coverage of MOTOTRBO with this entry-level digital trunking system. With multi-site Capacity Plus (formerly Linked Capacity Plus) you can connect up to 15 sites, each with up to 8 voice and data repeaters - plus up to 12 dedicated data repeaters.

CAPACITY MAX
COVERAGE, CAPACITY AND CONTROL FOR SINGLE AND MULTIPLE SITES
The next generation of trunking has arrived. MOTOTRBO Capacity Max blends innovation with Motorola’s extensive real-world experience of trunked radio systems to deliver a scalable communications solution that’s perfect for your business.
Using the SLR 1000 repeater, you can easily extend the range of your network through dead zones and across remote locations, so everyone’s within reach. Deploy the SLR 1000 indoors or out—it’s IP65-rated for dust and water protection. The compact size gives you more installation options. And a low power, fanless design uses less space and energy.

A next-generation DMR repeater, the SLR 5000 Series offers high performance, high efficiency and a design for the future. The product has a 50 W continuous-duty output and high sensitivity for optimum coverage, and high reliability and low power consumption for low cost of ownership. With a slim, modular design, the product is easy to install and service.

Built on the slim next-generation repeater platform, this repeater supports up to 100 W continuous-duty operation, with high sensitivity for exceptional coverage. The modular design keeps reliability high while allowing for configurable options.

Maximize the performance of your MOTOTRBO system with the 40 W XPR 8000 Series repeaters. They utilize Dynamic Mixed Mode capability to ease migration by automatically switching between analog and digital mode. The XPR 8000 Series supports two simultaneous voice or data paths in digital mode, doubling capacity without adding new frequencies.

Repeaters, controllers and gateways are the backbone of your MOTOTRBO two-way radio system. They ensure your radio network is available at all times and that communications are clear, reliable and secure across your enterprise.

Part of the next-generation Capacity Max trunking solution, the System Server hosts control and management functions. Each server can support up to 100 voice/data talkpaths. Redundant servers can be provisioned to increase system resilience.

Get robust and secure management of your client WAVE accounts. The WAVE Server deployed on your premise provides the interface between public cellular networks and the MOTOTRBO radio network for secure centralized provisioning, client management, call history, upgrades and diagnostics.

Get WAVE broadband PTT without the startup costs or maintenance that come with servers installed in your facility. Cloud-based WAVE deployments use a simple WAVE Gateway to connect MOTOTRBO Capacity Plus or Capacity Max systems to our WAVE servers in our secure data center.
Applications

With a wide range of applications and an expert application partners program, MOTOTRBO offers custom solutions that truly meet your business needs. Business-specific applications like these increase the level of efficiency, safety and productivity throughout your enterprise.

**Applications**

**Command and Control**
These applications work behind the scenes of your MOTOTRBO network to enhance the efficiency and responsiveness of your system. Interfacing to a Work Order Ticketing system, managing alarms and telemetry, and connecting to other messaging systems, they bring significant benefits to your business.

**Personnel Safety**
Increase the safety and accountability of your staff by deploying these applications. Features such as Man Down and Lone Worker can be linked to indoor and outdoor location services for maximum effectiveness.

**Interoperability**
Connect your MOTOTRBO radio system to other communication systems. From analog two-way radio systems to SIP telephone networks to cellular providers, you can increase efficiency and increase collaboration.

**Location**
Track your vehicles and your staff for improved safety, security and accountability. These applications allow you to make the most of MOTOTRBO’s GPS capabilities, and some even offer indoor location tracking capabilities.

**System Monitoring**
To get the best from your MOTOTRBO system, you need to know how it’s performing. These applications give you a dashboard view of key metrics and parameters, with detailed logs helping you plan future growth and upgrades.

**Text Messaging and Email**
Enhance productivity by connecting your radio network with your text and email system. Allow your staff to use advanced work order ticketing solutions, or simply streamline the flow of information between office and shop floor.

**Voice Dispatch**
Giving you centralized control of your workforce, these applications offer customizable user interfaces to allow your dispatcher to coordinate your staff efficiently and effectively. They also enhance business connectivity by allowing telephony interconnections and multi-system patching.

**Work Ticket Management**
These applications enhance efficiency and accountability in the workplace using text-based issue management software. They can be integrated with your existing work-order management solution or can be operated as an independent system.
CONSOLES & SYSTEM MANAGEMENT

With options designed for your business, this portfolio of dispatch consoles and system management applications has the features you need to make quick decisions, mobilize a fleet and keep teams informed.

**AVTEC SCOUT**
Scout is a true VoIP console system: all its components may be distributed over a LAN/WAN using standard Ethernet connections. The system uses a wireline interface to connect with MOTOTRBO systems, for increased functionality, call capacity and system reliability.
Scout provides a dedicated media workstation. This allows customers to operate on standard hardware for reduced costs. Radio, Telephony, and I/O integration are supported.

**GENESIS GW3-TRBO**
GW3-TRBO represents the ultimate in system management for MOTOTRBO. With GW3-TRBO, you have an easy way to generate detailed metrics of your MOTOTRBO system performance.
GW3-TRBO connects directly to the MOTOTRBO system through a wireline interface. It captures usage information for every site, channel, slot, talkgroup and subscriber.

**TRBOnet**
TRBOnet Plus is an IP-based dispatch application that enables users to fully control and manage all available resources. The software includes a wide range of advanced features and functions to extend capabilities beyond basic dispatch. Text messaging, voice recording, telephone interconnect and many other features all combine to boost communication efficiency.

**SmartPTT**
SmartPTT PLUS is a dispatch software application for distributed MOTOTRBO radio networks. Standard functionalities include voice dispatch, texting, job ticketing, event logging and more. Optional features include GPS tracking, indoor location, voice recording, interoperability, telephone interconnect and a web client for remote system access. SmartPTT supports both the digital functions of the MOTOTRBO radios or their analog mode for a seamless migration to a DMR system.
WAVE™ BROADBAND PUSH-TO-TALK

WAVE client applications provide the user interface to a WAVE communication system and are available for smart phones, tablets, and desktops.

WAVE APPLICATIONS
ENABLE YOUR WORKFORCE TO CONNECT AND COLLABORATE

With WAVE Dispatch you can use a web browser to access your MOTOTRBO radio channels.

With the WAVE mobile application, incorporate PTT, photos, video and more into a single communication session.

CONSOLES & SYSTEM MANAGEMENT

COMMUNICATE WITHOUT BOUNDARIES
Eliminate barriers between devices, networks and locations, and let everyone be part of the conversation.

SEAMLESSLY EXTEND RADIO COMMUNICATION
Extend your private and group calls to broadband with a direct wireline connection.

ONCLOUD
No servers to buy, install or maintain so you can focus on your business.

ON PREMISE
Take control of your communication with enterprise-grade equipment installed on-site.

TAKE PTT FURTHER
The Value of Software Updates

MOTOTRBO, as all computing systems, is composed of hardware and software. The value of hardware is significant, but static. The value of software, on the other hand, keeps growing over time. Access the latest and greatest features and functionality available with each software release for added capabilities, security, and reliability. This increases the value of your investment with every update.

The Value of Hardware Repair

Our two-way radios and infrastructure are built for superior performance. With expert hardware repair, all radios and infrastructure are returned to factory specifications. Service centers are certified to comply with ISO9001.

Access to Premium Software Features

Experience the power of the MOTOTRBO platform and go beyond voice with access to premium software features, previously sold a la carte. The features you need to increase productivity aren’t wishful thinking — they’re a smart reality. Enable the right premium software features for the right teams, so they can be safer and more efficient when it matters most.

Motorola Solutions is enhancing the MOTOTRBO platform with new service packages that include access to software updates, premium software features and extended hardware repair services. Your business’s security and technology needs are rapidly evolving, and we want to make sure you have a world-class experience each and every time you use your MOTOTRBO products.

Critical communication has become increasingly complex as your MOTOTRBO two-way radios become more IP-based, supporting integrated data applications and enhanced features. Rely on us to help you achieve your performance targets with the right level of service you need for your radio fleet. With Premier Services, you transfer your MOTOTRBO two-way radio operations to our experienced managed services professionals to address the evolving technical and functional requirements of your two-way radios. To learn more, please visit motorolasolutions.com
Trust MOTOTRBO to transform the way they work.

Today, from the production line to the power line, MOTOTRBO radios are helping people work more efficiently, productively and safely. MOTOTRBO delivers the game-changing advantages of digital technology – from superb audio to expansive coverage – along with business-essential systems, applications and accessories that unleash the power of the radio.

MOTOTRBO puts the right device into the hands of the right user, to empower your workforce and transform your enterprise.

CUSTOMER PROGRAMMING SOFTWARE
The MOTOTRBO Customer Programming Software (CPS) provides complete access to the configuration of your radio. Update firmware, enable features, change talkgroups, add language packs and upload voice announcements to your radio from your desktop.

RADIO MANAGEMENT
As an add-on to the CPS software, Radio Management gives you the capability to program radios in batches to standardized templates. Reduce errors, organize large fleets more efficiently, and streamline large-scale updates.

OVER-THE-AIR PROGRAMMING
Over-the-Air Programming (OTAP) allows you to update radios remotely, either via Wi-Fi or over the MOTOTRBO network. Updates can be centrally managed and scheduled to minimize disruption to your business-critical communications.

MYVIEW PORTAL
MyView Portal is a web-based platform that gives you a transparent, single source view for system and service delivery information to help make smarter, faster and more proactive decisions to keep your network running smoothly and effectively.

IMPRES FLEET MANAGEMENT
Regularly monitor the health and status of your radio fleet. By collecting data from each battery, you can now see recommendations on which batteries need replacing so that you can better optimize your battery spend over the lifetime of your radio fleet.

1. SLR Repeaters can be used for Extended Range Direct Mode.
2. Minimum capacity based on standardization non-traffic load model.
